### Of Adopting A Puppy

DO: Make a separate area for your new pup. The entirety of your home can be overwhelming. This be a small area in your living room or kitchen or even an entire bedroom if you have the space.

DON'T: Throw a party for your pup just yet. Keep interactions (with humans and animals) brief and to just the members of your household for the first few days. Remember, slow and steady wins the race.

DO'S & DON'T'S
